Notice Text

SOC Warning Cancelled - Draft Condition

The Warning of Strained Operating Condition ("SOC") for a Draft condition issued on August 31, 2017 (Critical Notice No. 17561) has been cancelled. The gulf coast natural gas liquid (NGL) processing and storage operations stabilized through the weekend. While EPNG continues to experience higher average heating values (BTU) from supplies entering the system in the San Juan and Permian basins the potential for a reduction in supply has been diminished.

Customers are still encouraged to monitor their transport to ensure that their takes are in balance with their supplies and to ensure their scheduled supplies are performing as expected.

For scheduling questions, please call your scheduling representative at (800) 238-3764.

For operational and capacity questions, please call Russ Pyeatt at (719) 520-3729 or Dan English at (719) 520-4722.
